## 1. Generative Classifiers and Discriminant Classifiers

### 1. Generative Classifiers and Discriminant Classifiers

| <https://www.linkedin.com/pulse/generative-classifiers-vs-discriminative-akanksha-malhotra/>

#### **Generative Classifiers**

Generative Classifiers tries to model class, it tries to learn the actual distribution of the class

#### **Discriminant Classifiers**

Discriminative Classifiers learn what the features in the input are most useful to distinguish between the various possible classes, these models try to learn the decision boundary for the model
